

Dear Recipient,

We would like to introduce you to a unique educational opportunity together with the **Massachusetts Institute of Technology**.

If you are a PhD student, postdoctoral researcher, corporate or university researcher, or a clinician interested in healthcare innovation, you are invited to apply to participate in this new and exciting project that address real healthcare needs!

Széchenyi István University, in collaboration with the **Massachusetts Institute of Technology**, is launching the **MIT Catalyst Europe programme** between 7 September 2023 and 7 March 2024. The programme will mostly take place online, but there will be a few days of physical presence required in Győr in September 2023 for the intensification phase.

What is exactly the MIT Catalyst Europe programme?

Catalyst Europe focuses on creating impact from biomedical technology research, supporting talented researchers, clinicians, and professionals working in healthcare organizations. The programme aims to enable participants to identify and assess unmet medical needs in collaboration with industry, clinical, and higher education institutions. It also aims to form multidisciplinary teams to design solutions and plan research projects that can have a significant impact on healthcare.

If we have aroused your interest, click on the following website for more detailed information about this educational opportunity: <https://www.catalysteurope.eu/2023-edition/>

To learn more about the Catalyst programme, we cordially invite you to participate in the **Catalyst Europe 2023 international webinar**, to be held on **3 July at 16:00 (CEST)**.

The registration link to the Catalyst Europe 2023 webinar is available below:
